

LIFE, FACES & FIGURE GROUP

REPORT FOR THE ANNUAL MEETING

The Life, Faces and Figure Group aims to provide activities for the club members who are interested in the broad range of people photography, including headshots, head and shoulder portraits, full and partial body portraits, couples, groups, family portraits, children, fashion glamour, boudoir and nude studies.

Since the last general meeting there have been forty-four events involving the photography of people with a total participation of 236. Thirty-eight of these events took place in the RA Photo Club studio, and six took place outdoors.

Among the forty-four events were some which were actually planned and executed by the studio management group, but they need to be counted here to illustrate the RA Photo Club's full range of support for members who are interested in this type of photography.

Most events offered were three or four hour events, but some were whole day events.

All events involved people photography. Some were very technical in their content, others were well suited to providing the membership with organized, social opportunities to use their cameras.
